Professional Summary:

- I am experienced, result-oriented, proactive and responsible Front-End Developer with over 3.5 years of hands-on experience in creating, optimizing, and maintaining responsive, cross-browser web interfaces of varying complexity, including efficient integration with back-end systems.
- In addition to using core front-end technologies and tools — HTML5, CSS3, Bootstrap-grid, JavaScript (ES6), jQuery, BEM, Git, Figma — I have experience with API integrations and developing front-end parts of admin panels in conjunction with Laravel. To improve workflows, I also created technical documentation.

Skills:

- HTML5
- CSS3
- Bootstrap-grid
- JS (ES6)
- JQuery
- BEM
- GIT
- Figma
- React (currently learning)
- PHP/Laravel (currently learning)

Education:

- 09.2005 – 06.2009** : Donetsk National University, **Bachelor**, Finance
- 09.2009 – 06.2010** : Donetsk National University, **Master**, Finance
- 10.2018** : Educational online service Prometheus – **Front-End** course
- 08.2019 – 07.2020** : Computer academy STEP(Kyiv) – **Front-End** course

Languages:

- English - Intermediate
- Ukrainian - Fluent

Work Experience:

12.2022–06.2025: Vassabi Limited LTD (Kyiv) - **Front-End Developer (Remote, Full-time)**

- Development of landing pages of various complexity levels and configuring their interaction with the server;
- Code refactoring and updating content on existing landing pages;
- Creating and integrating APIs into landing pages and ensuring their correct functionality;
- Migrating landing pages to new servers and optimizing their performance;
- Preparing technical documentation for the processes I was responsible for within the company;
- Developing the front-end part of two admin panels and setting up their interaction with the server in collaboration with a back-end developer for internal company needs.

Tech Stack: HTML5, CSS3, JS, jQuery, Git, Figma, Binom, PHP - the essential minimum required for synchronizing websites and API integrations with the back-end. The front-end development of admin panels was carried out within the Laravel framework.

Achievements: Developed new efficient, responsive, and cross-browser landing pages, and also optimized the performance of existing ones. Improved the website verification mechanism prior to production launch. Successfully moved the API integration functionality from the back-end to the client side, following the client's documentation, and relaunched it after a long pause. Additionally, updated the front-end part of the integration, which improved its performance. Migrated landing pages to new servers, performed their optimization, upgrade, and synchronization with one of the admin panels, which significantly increased their operational efficiency. Developed and implemented the front-end part of two admin panels, which greatly simplified and optimized internal workflows for the company's managers.

03.2022-12.2022: Acquisition of new skills

- Completed test tasks during the job search (projects are presented in the portfolio): <https://yevhentar.github.io/Portfolio/>

04.2021-03.2022: Top Media Groups (Kyiv) - Front-End Developer (Office, Full-time)

- Development of prototypes for single-page and multi-page websites.

Tech Stack: HTML5/CSS3/JavaScript/JQuery, Bootstrap-grid, Media queries, Swiper.js, Mixitup.js, Scroll-out.js, Parallax.js, rellax.js

Achievements: Developed single-page and multi-page websites with a responsive interface, significantly improving usability across various devices. Used core web technologies (HTML5, CSS3, JavaScript, JQuery), along with layout tools (Bootstrap grid, media queries) and libraries (Swiper.js, Mixitup.js, Scroll-out.js, Parallax.js, rellax.js) to implement interactive features and visual effects. As a result, enhanced overall user experience and increased the performance of the company's web solutions.

08.2016-09.2017: retail chain "Dzerkalny" (Mariupol) - PC operator
